

Configuring EasyTrak DeskClient Options

There are many configurable parameters which can be used to change the way the EasyTrak DeskClient behaves to just the way you want it. Here we describe the way to make changes, and then list the parameters that are available to modify.

The configuration is stored in a file on your local computer called `config` usually located in: `C:\Program Files\SkillSense\EasyTrak\config` or the equivalent location on your computer. We are going to edit that file and save our changes.

1. To change the config file, EasyTrak DeskClient must be stopped (otherwise your changes will not take effect, and the next time you restart your computer, your changes will be lost). So first right-click on the EasyTrak blue clock icon in the System Tray, and select exit.
2. Open Windows Explorer and find the config file (in the location as described above), and make a copy in the same folder called `config.bak` for example, in case anything goes wrong while we're editing it.
3. Open the file in Notepad, and edit the parameters according to the list below. You can always try multiple edits, and try it out to see if it has the desired effect. Don't forget to start and stop the EasyTrak DeskClient every time. When you have finished making changes save the file. If the parameter you need to set a value for in the list below is not present, you can safely add it.

<u>Parameter</u>	<u>Default Value</u>	<u>Comment</u>
<code>user</code>		Do not change
<code>pass</code>		Do not change
<code>domain</code>		Do not change
<code>payroll</code>		Do not change
<code>defaultChargeCode</code>		The default charge code ID if none is selected – not normally used
<code>showDeleteButton</code>	<code>f</code>	Whether the 'Delete' button should be shown in the

		Time Details Editor [t or f]
stopClockOnHibernate	t	Whether EasyTrak clock should be stopped when the PC is put into hibernate mode
reminderInterval	30000	How often (in milliseconds) the reminder pop-up should appear
reminderDuration	5000	How long (in milliseconds) the reminder pop-up should remain visible
enableReminders	t	Whether pop-up reminders should be enabled at all
timeDetailDays	7	The number of days to show in the Time Details Editor
userTimeFormat	h:mm aa	The format to use for your time display. Note: contact SSi support for guidance if you want to change this value
lastConfigUpdate		Automatically generated - Do not change
alertOverlaps	t	Whether EasyTrak DeskClient should alert about overlaps between time periods within a single day.
tdDueDaysAhead	7	How many days should the Todo List Manager look forward from 'now'.
tdQuickAddMsg	<empty>	The default Todo Item message added by 'Quick-Add'.
tdPriorityCount	5	How many levels of priority should be available to manage Todo Items.
logFile	<empty>	SSi Support may request you to generate log file for diagnostic purposes. This is where the filename is specified.
configUrl		Do not change
configUpdateInterval	300000	Do not change
serverDomain		Do not change
submitterClassName		Do not change
submitInterval	60000	Do not change
httpTimeout	120000	Do not change
http-debug	0	Do not change
staleDateLimit	7	How many days EasyTrak DeskClient should keep trying to submit data, before it is considered "expired".
