

# EASYTRAK DESKCLIENT

**EASY PROJECT TRACKING FOR BUSY  
PROFESSIONALS!**

The **EASYTRAK DESKCLIENT** from **SSi** is an easy, non-intrusive way to help you track your time by project.

A small utility runs in the background in the System Tray on your laptop or desktop PC. With one-or-two clicks it helps you to access different charge accounts, sorted by customer, job, etc. and charge your time accordingly.

***“We were delighted with how easy it was to get our consultants to track their time, after trying for ages with spreadsheets!”***

The EasyTrak DeskClient is a small foot-print, low profile utility, but is always there to help when you need it, and is backed by the power of SSi server side solutions!

**GOOD TO GO:** The EasyTrak DeskClient safely stores all of your project transactions, even when you are off-line or traveling. When a secure server connection becomes available, it transmits any outstanding transactions to the server, without any user action required. At the same time, updates (such as recently added customers, new projects, etc.) are also transferred from the server.

Date	Start	End	Record ID
10/09/2005	Recorded	12:06 AM	12:29 PM
	Adjusted	12:06 AM	12:07 AM

	Adjusted	4:21 PM	7:19 PM

*Easy to use time sheet editor*

Time records are available for review, editing and individual reporting both while traveling (off-line) and on-line. Comprehensive roll-up reporting in printable, spreadsheet, or many other formats is available on-line.

Custom business rules can be used to automatically apply unique allocations and guidelines in as much detail as needed. A simple time sheet editor makes it easy to add new transactions, or even to add whole days, for vacation days or stat holidays.

**TIE-IN WITH SHOP FLOOR COSTS:** By using the same powerful server side infrastructure as other EasyTrak solution components (EasyTrak Kiosk, handheld clients), costs can be analysed alongside these other items, allowing a seamless integration of costs from different sources, e.g. for project cost tracking, SR&ED tax claim tracking purposes, actual vs. budget analysis by project, etc.
