

# SOLUTION COMPONENTS

**EASY TO DEPLOY AND USE  
WORKFORCE MANAGEMENT !**

Employee-facing products from SSI deliver robust, effective solutions module by module. Each product is designed to integrate smoothly into a precise solution that delivers exactly the functionality required without forcing additional investment in unnecessary components.

Here's a brief survey of individual product features and functions.

**EasyTrak** delivers a broad range of functionality related to employee time and activity capture, as well as project and tasks management.

For hourly employees on the shop floor, an **EasyTrak Kiosk** unit provides simple, reliable time and attendance capture, as well as basic job tracking, with real time reports and charge code updates. Addition of barcode or RFID reader technology can enhance the basic touch screen input for both speed and quantity of data gathered allowing more sophisticated data capture and operational reporting.

Biometric authentication is also available as an EasyTrak Kiosk upgrade.

### **Product or Service?**

All solution components are available either as a Software Service, delivered securely over the web to your local web browser, with no local installation or maintenance needed, or in a 'purchase plus support' deployment within your existing IT infrastructure. The choice is yours!

For professionals who require weekly time sheet functionality, **EasyTrak DeskClient** provides a simple, non-intrusive interface at the desktop, or on the road, to track or edit and report on hours by project. 'Over-under' reporting reveals problem projects at a glance.

**EPM360** provides a broad-based foundation of performance management in the organization, makes it easy to develop individual performance plans, and

### **Mobilize your EasyTrak / EPM360 investment!**

Get selected data 'pushed' to your mobile device with the EasyTrak SMS service. That way you are 'heads up' on

key operational events *before* arriving on site.

to manage goals, job descriptions, and performance gap analysis for both individuals and teams. For larger organizations, with more complex performance management needs, **EPM360 PI** delivers sophisticated performance analysis and optimisation.

**EPM360 Review Writer**, with access to a vast library of off-the-shelf performance descriptors for different industries, makes writing clear effective performance reviews quite painless, and guides inexperienced managers through the process step-by-step.

**e-HR** is used for basic employee information management, with self-service access where appropriate. Like all products, it is tightly integrated with the SSI platform.

**BPM** is the foundation of SSI solutions, and provides fine-grained security, language translation, external integration, messaging and other business process management tasks.
